

【Example of address】

Mr. ABC
Bldg. 123, Financial Street,
Xicheng District, Beijing
CHINA

1

The screenshot shows the '邮编查询' (Postal Code Search) interface. It has two tabs: '地址查询邮编' (Address Search Postal Code) and '邮编查询地址' (Postal Code Search Address). The '地址查询邮编' tab is active. There are two main input fields: '* 省市区县' (Province/City/District/County) and '* 详细地址' (Detailed Address). The '省市区县' field is a pull-down menu with a list of provinces and cities. The '详细地址' field is a text input. A red box highlights the pull-down menu, and a callout box points to it with the text: '① Select province, city and district in the pull-down menu.'

2

The screenshot shows the '邮编查询' interface with the '省市区县' field set to '北京市 / 北京市 / 西城区' and the '详细地址' field set to '金融大街'. A red box highlights the '详细地址' field, and a callout box points to it with the text: '② Enter detailed information.' Another red box highlights the '查询' (Search) button, and a callout box points to it with the text: '③ Click.'

3

Search results are displayed.

The screenshot shows the search results interface. It has two tabs: '邮政编码' (Postal Code) and '邮编对应街道' (Postal Code Corresponding Street). The '邮政编码' tab is active. The results are displayed in a table with three rows, each showing the postal code '100033' and the address '北京市西城区金融大街10号' or '北京市西城区金融大街11号'. A red box highlights the first row, and a callout box points to it with the text: 'The postal code is displayed.' Another red box highlights the second row, and a callout box points to it with the text: 'When entering the postal code of the recipient in the International Mail My Page Service, please input it in the Postal code field of the recipient's information.'
