

**【Example of address】**

Mr. ABC  
náměstí Republiky 123  
Praha 1  
CZECH

### Find postcode and delivery information

The screenshot shows a web interface for finding postcodes and delivery information. It includes a search bar at the top with the text "praha", a "Search" button, and an "Extended search" link. Below the search bar is a "Find postcode" button. The main form area has a "District" dropdown menu, a "Street name" input field containing "náměstí Republiky", and a "House number" input field containing "123". Below the form, a table displays search results for "praha". The table has columns for District, Municipality, Municipal district, and Postcode. The first row shows "Hlavní město Praha", "Praha 1", "Staré Město", and "11000".

① Enter municipality.

② Click the button to enter detailed address.

③ Enter street name.

④ Enter house number.

⑤ After entering the address, click the button.

The postal code is displayed.

When entering the postal code of the recipient in the International Mail My Page Service, please input it in the Postal code field of the recipient's information.
